Assembly Instructions for GWR-W45 Wall Mounted Windshield Rack:

1. Lay out the uprights with the upright support braces.
2. Attach the upright support braces to the uprights using the supplied hardware. Leave all hardware loose until all upright support braces are installed.

3. When all of the pieces are installed on the rack go back and tighten all of the hardware.
4. With the help of another person hold the windshield rack up to the wall where you would like to mount it.
5. Mark the locations of the mounting holes on the wall and set the windshield rack aside.
6. Drill the mounting holes into the wall. Then, reposition the windshield rack and secure it to the wall.

NOTE: Be sure to check local building codes for which type of mounting hardware is required. To prevent injury, use the proper fasteners matched to the particular wall surface and the weight of the rack.

If you have any questions, please feel free to contact us at anytime.
